The four reports that move the market

What each one measures, who publishes it, when it comes out and where it stands now. Numbers as of November 2, 2026, straight from the Bureau of Labor Statistics and the Federal Reserve.

Consumer Price Index

3.7%

Prices over the past 12 months, as of September 2026. Up from 3.4% the month before.

How much the prices people pay for everyday goods and services changed, from groceries and gas to rent.

Published by	U.S. Bureau of Labor Statistics
Comes out	Monthly, around the middle of the month, at 8:30 a.m. Eastern
Your money	It is the best-known measure of inflation. When prices rise quickly, the Federal Reserve can keep interest rates higher for longer.

Payroll jobs

+29K

Jobs added in September 2026, after +133K the month before.

How many jobs employers added or cut last month, outside of farm work.

Published by	U.S. Bureau of Labor Statistics, in the monthly jobs report
Comes out	Usually the first Friday of the month, at 8:30 a.m. Eastern
Your money	It is one of the clearest signs of whether the economy is growing or slowing, and it often moves markets the morning it comes out.

Unemployment rate

4.2%

Share of people looking for work in September 2026. 4.1% the month before.

The share of people who want a job, are looking for one and don't have one.

Published by	U.S. Bureau of Labor Statistics, in the same jobs report
Comes out	Usually the first Friday of the month, at 8:30 a.m. Eastern
Your money	The Federal Reserve's job is to keep prices stable and employment high, so it watches this number closely.

Federal funds rate

3.75–4.00%

Held on October 28, after a quarter-point raise in September.

The interest rate banks charge each other to borrow overnight. The Federal Reserve sets a target range for it.

Published by	Federal Reserve
Comes out	Decided at eight scheduled meetings a year, announced at 2:00 p.m. Eastern
Your money	It ripples out to the rates on mortgages, car loans, credit cards and savings accounts.
